DETAILED ACTION

1. An Applicant's Response and Amendment filed on October 16, 2006 has been entered. Claims 1, 3, 4, 6-21, 23, and 24 have been amended. Overall, claims 1-24 are pending in this application.

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-13, 16-18, and 21-24, drawn to an engine air-fuel ratio control system and method with exhaust gas sensor located upstream of a catalytic converter and controlled each cylinder individually, classified in class 123, subclass 673.
 - II. Claims 14, 15, 19, and 20, drawn to an engine intake control system and method having poppet valve operating mechanism and means for varying timing of intake and exhaust poppet valves, classified in class 123, subclass 90.15.

3. The inventions are distinct, each from the other because of the following reasons:

Inventions of Group I and Group II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different functions. In Group I, the function is to adjust an engine operating parameter such as a fuel injection amount for each individual cylinder based on a signal provided by an exhaust gas sensor located upstream of a catalytic converter. In

Art Unit: 3748

Group II, the function is to adjust the timing of engine intake and exhaust poppet valves based on parameters (load, rotational speed) of the engine. Thus, the functions of the inventions of Group I and Group II are clearly different.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. A telephone call was made to Kevin A. Wolff on January 8, 2007 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Examiner Tu Nguyen whose telephone number is (571) 272-4862.
